Office Action Summary	Application No. 10/645,973	Applicant(s) PORTER 	
	Examiner Carl S. Miller	Art Unit 3747	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3747

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 5-6, 9-10 and 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Timberlake in view of Torgerud.

Timberlake teaches all of the limitations of these claims extend the idea of mounting the auxiliary pump in the fuel tank.

Torgerud teaches a marine engine which uses plural electric pumps within the same fuel tank. While the pumps in Torgerud are in series and not parallel, the reference would suggest to one of ordinary skill in the art that more than one electric pump could be mounted in the same fuel tank, including a pump which feeds an auxiliary fuel line.

It would have been obvious to modify Timberlake by mounting the auxiliary fuel pump in the fuel tank as suggested by Torgerud.

Claims 3, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Timberlake and Torgerud as applied to claim 1 above, and further in view of Hawes.

Hawes teaches male and female locking cams used to attach a fluid line to a submersed pump, thereby making it obvious to use this type of connector in Timberlake since the environments are similar in nature.

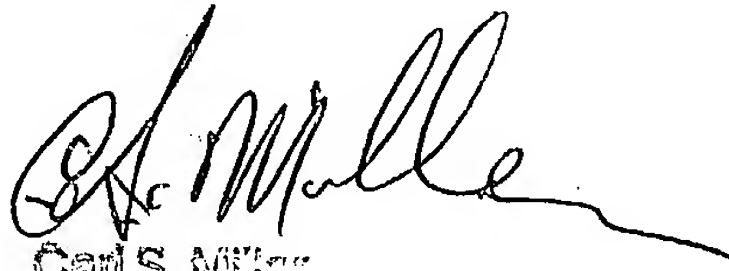

Claims 4, 7-8 and 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
